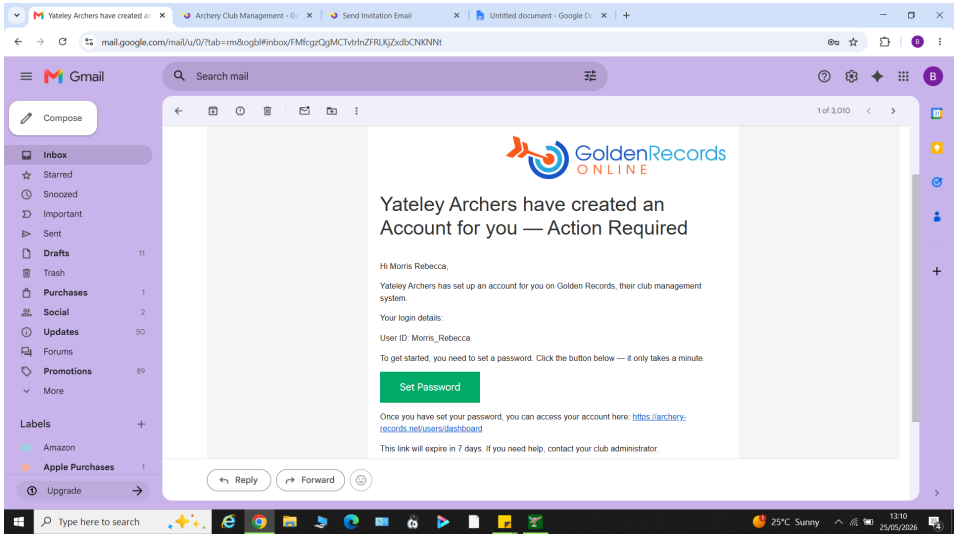
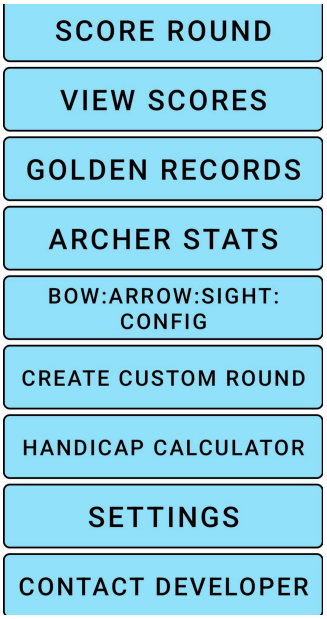
How to use the app

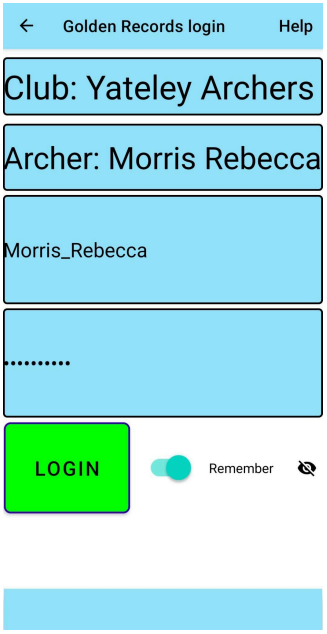
- Download the app https://archery-records.net/ Available on IOS and Android
- You will receive an email from Golden Records to activate your email address, give you a username and update your password.



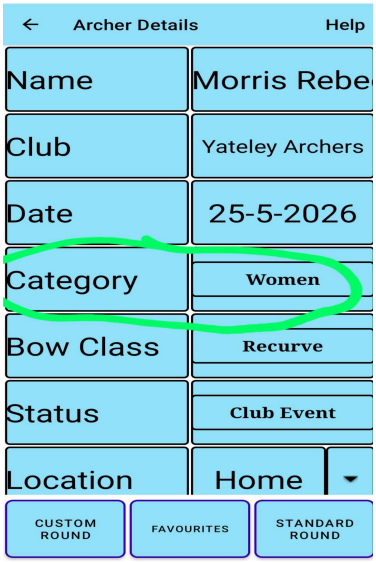
- When you open the app it will look something like this



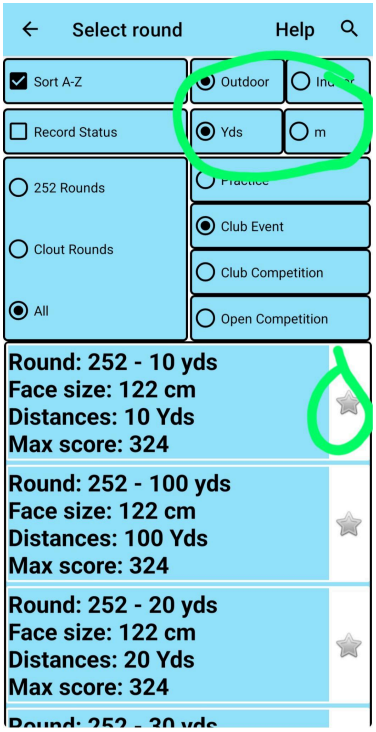
- When you go onto the Golden records button, you will be able to sign in using your username and password that you have set up and the login in button should go green



- You will be able to see your previous scores on the system.
- When doing a score, you press the score round button, and everything should have transferred from Golden Records, just check the age category as you might need to change this, especially for Juniors and those of 50+, as seen below.

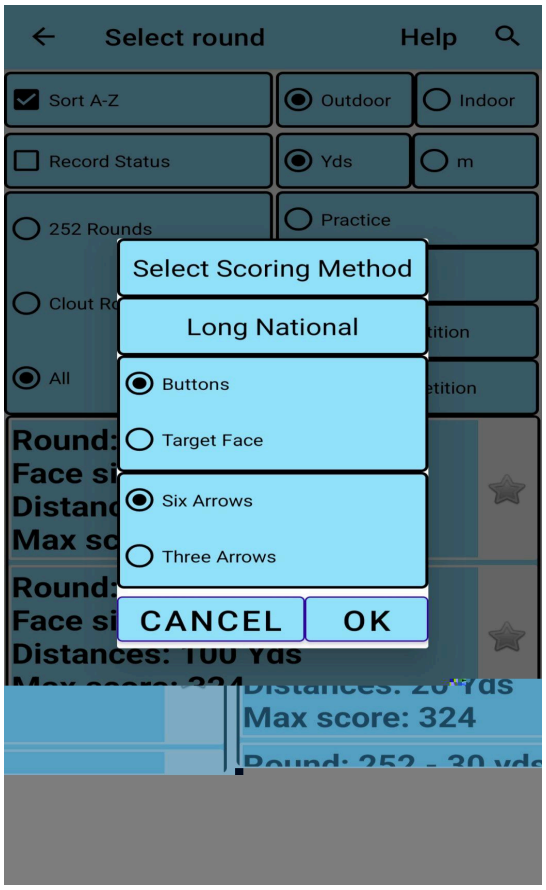


- You can then score as normal by pressing standard rounds and checking the indoor/outdoor and m/yd buttons.

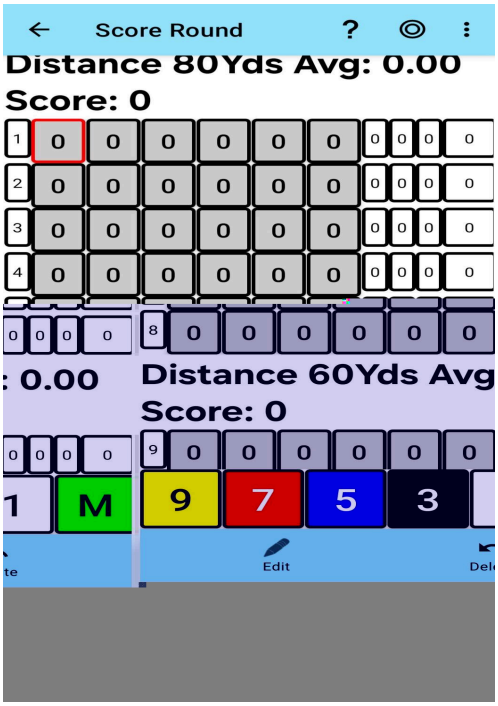


- You can also press the star button and it will put the round as your favourites so it is easier to find next time.

- When you have picked what round you have decided to shoot, it will come up looking like this below.



- You can choose whether you score using the buttons or target face, you can interchange when on the app.



Score Round
Distance 80Yds Avg: 0.00

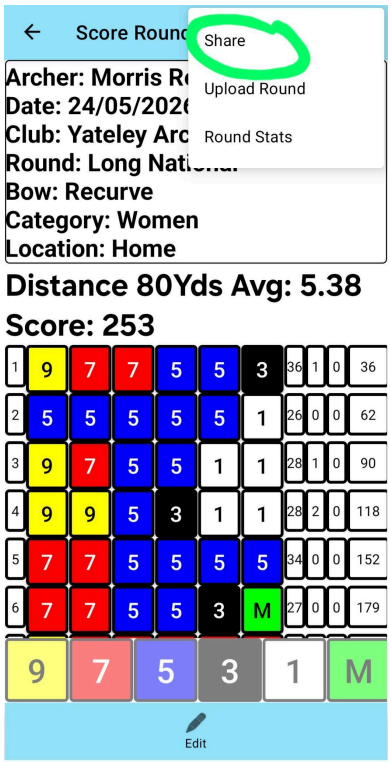
For Android Users

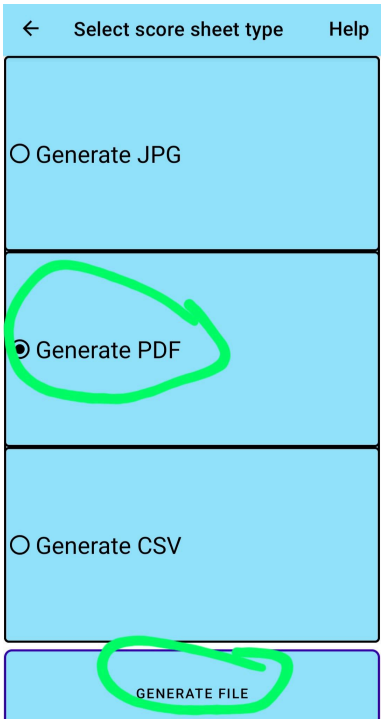
- When you have finished your round, you will come to a screen. You will then need to press the 3 dots in the corner

- You then need to press the share button.

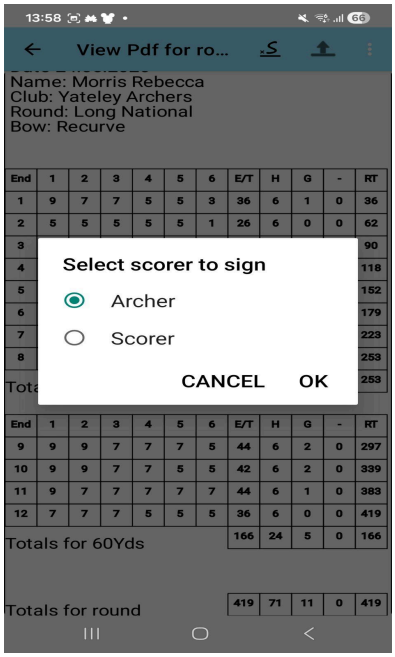


Y

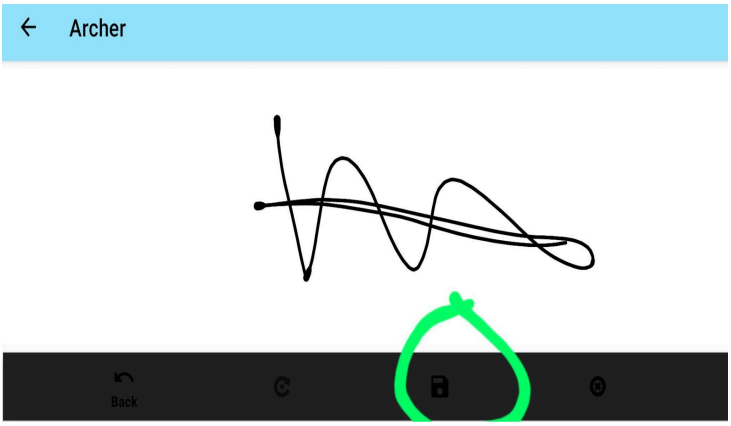
- You then will come to a page like this, you need to press generate PDF and then generate file.



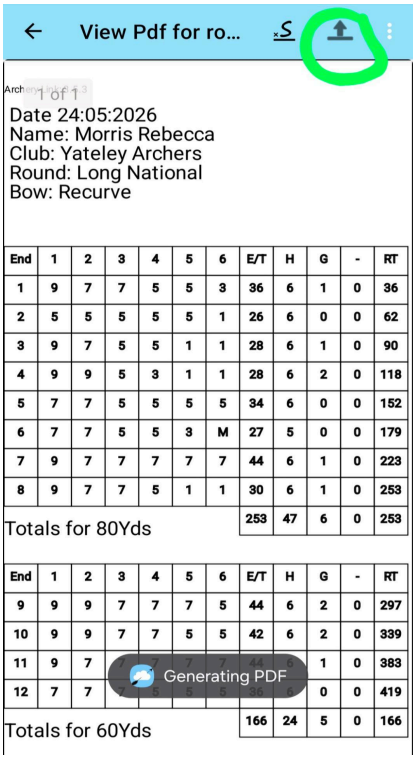
- This will take you to your score sheet. You then press the signature button in the corner and then it will say whether you want to sign for scorer or archer.

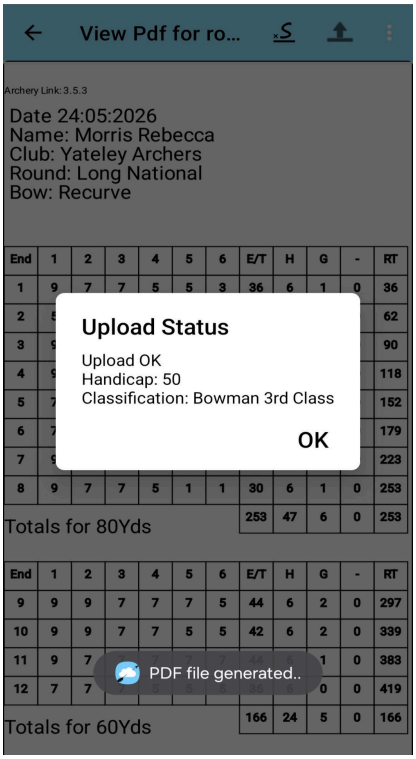


- You will then be prompted to turn the phone landscape so you can sign it, don't forget to save it at the bottom

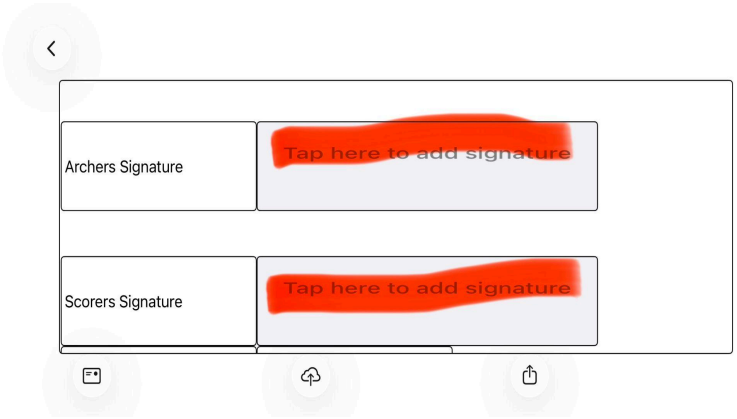


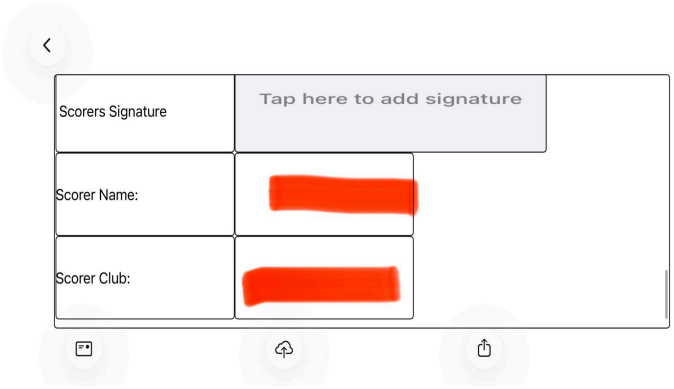
- Once you have signed it, you can upload it to the system by pressing the up arrow in the corner and it will come up that you have uploaded to the system, as well as your handicap and any classification achieved during that round.

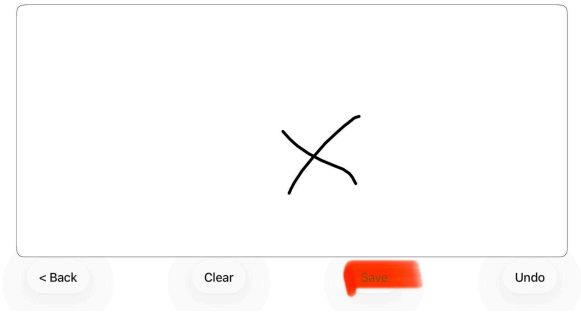




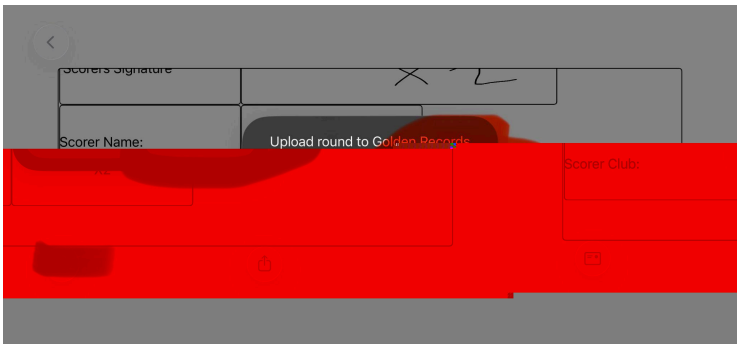
- From there, the screen rotates to landscape, you can then sign, counter sign and type arches and scorers names. Ensure you tap save after signing and typing.







- From there tap the upload button (cloud with the up arrow) and confirm you want to upload to Golden Records.



You have now successfully uploaded your score to golden records and completed your score.
